GHE Training Spotlight: Language Acquisition

Learning another language and practicing cultural competency improves rapport and understanding while engaging with partner nations.

Improve your foreign language and cultural competency skills using the resources below:

- Defense Language Institute Foreign Language Center
  - Global Language Online Support System (GLOSS)
  - Rapport Training
  - Headstart2 Training
- USAF Culture and Language Center (AFCLC)
- USMC Center for Advanced Operational Culture Learning (CAOCL)
- Joint Language University (.mil, .gov, and DoD only)

Apply for the Global Health Specialist AQD and Program!

GHE VISUAL IMAGERY

Photography is a valuable way to document GHE missions for posterity and to ensure amplification of efforts across the enterprise. Coordinate coverage of GHE activities through your PAO & chain of command.

When explicitly allowed, we encourage you to capture visual imagery and to submit that photography for public release. We have compiled tips from relevant guidance your reference. Access the photography tips on the GHEO SharePoint site [here](#).

Please follow all official guidance and use these tips as a reference moving forward. Your photos demonstrate the ways GHE is enhancing readiness the world over. Please email with questions, concerns or images to share.

ABOUT GHEO

Since its establishment in 2012, the Navy Medicine Office of Global Health Engagement has built a cadre of highly trained Global Health Specialists assembled from all Medical Department Officer Corps ready to conduct health security cooperation activities in resource-limited and dynamic environments around the world. These efforts aim to increase the resiliency and readiness of our Navy Medicine personnel, support the Fleet and line operations and build sustainable partnerships. This support ensures a ready force with the requisite competencies to address an increasingly complex and interconnected world where health threats do not respect borders.
