Footnotes:

1 Must be a graduate of a school of nursing accredited by the Accreditation Commission for Education in Nursing (formerly the National League for Nursing Accrediting Commission) or the Commission on Collegiate Nursing Education (CCNE) that conferred a baccalaureate degree or higher in nursing. Information found at: [http://www.acenursing.org/](http://www.acenursing.org/). Nurse Corps CSWSAB lists HPO specialties designated by the Secretary of Defense as critical to meet a Military Service's healthcare wartime missions. Justification for a critical designation consists of the criticality of the HPO skill, officer shortages due to recent force structure changes, or extremely high replacement or training cost.

2 As a Health Care Provider (HCP), AC HPOs must be currently credentialed, privileged (Advanced Practice Registered Nurses (APRNs)), and practicing at a facility designated by the military Service, in the Nurse Specialty for which the IP and RB is being paid. Nurses assigned to positions requiring a substantial portion of time performing military-unique duties under adverse conditions or in remote locations outside the United States, or that preclude the ability to spend appropriate time in a clinical setting, may request a waiver from the Chief, BUMED. General/Flag officers at the rank of O-7 and above are eligible for the IP and BCP in their credentialed specialty.

3 To be paid IP and BCP under the 1/30th rule, RC HPOs must be credentialed by the military Service in the specialty for which the incentive is being paid, while on Active Duty.

4 To be eligible for a Nurse IP and/or RB, the Nurse must be board-certified in the specialty concerned by the applicable Board listed in Table 3.
